Integrated diagnostics for anatomic pathology labs

Clinisys CoPathPlus™ helps anatomic pathology laboratories manage critical clinical data, required interfaces, and pathologist requirements for comprehensive efficiency, patient safety, and user productivity.

Interoperability for better coordination of care

- Receive orders and updates to eliminate data re-entry
- Send PDF reports to simplify physician access
- Multiple distribution options for efficient report delivery

---

Create integrated reports

- Navigate, edit, and compile reports following electronic Cancer Checklists (eCCs) via mTuitive CAP eFRM/xPert
- Incorporate clinical, molecular, and genetic test results in reports

---

Support quality and compliance

- Utilize comprehensive QC flagging and reporting
- Facilitate case correlations
- Review standard management reports for exceptions

Streamline and standardize workflow

- Automated ordering options
- Paperless workflow capabilities
- Surgical follow-up for abnormal cytology
- Integration with a multitude of third-party devices
- Voice dictation support

Improve patient safety

- Foreign container barcode support to reduce errors and minimize relabeling
- Real-time printing of identifiers, barcodes, and labels
- Track barcoded case assets throughout the lab and automate routing
- View case data and sample audit trails

Comprehensive Reporting with Clinisys VUE

Using Clinisys PowerPath and Clinisys VUE together streamlines the customizable worklists that allow for organization and management of cases based upon user preferences. Clinisys VUE also facilitates otherwise complex integrations to deliver to deliver streamlined reports combining AP and ancillary molecular testing, such as cytogenetics, flow cytometry, and NGS.
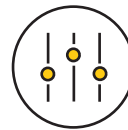

With flexible visualization and reporting, Clinisys VUE integrates multiple views of diagnostic information, helping pathologists efficiently and cohesively determine diagnoses.

Clinisys VUE	Synoptic reporting	Workflow efficiency	Specimen management

Enhanced Sunquest PowerPath Functionality

Clinisys PowerPath includes Clinisys VUE, which further streamlines the diagnostic review process.

With fewer clicks and better access to key clinical data and sign-out tasks, Clinisys VUE improves decision-making, efficiency, and reporting in anatomic pathology labs.

Using both solutions together, anatomic pathologists can save 2-3 minutes per case.

Key Features

- Clinisys VUE
- Customized case worklist management
- Streamlined stain orders and custom stain panels
- Auto-text creation and management

- Enhanced synoptic reporting
- Integration of historical and concurrent results
- Cloud hosting by Clinisys option available
