

Integrated diagnostics for anatomic pathology labs

Clinisys PowerPath® is a comprehensive laboratory information system (LIS) that supports streamlined, flexible anatomic pathology (AP) diagnostics. Integrated with Clinisys VUE™, Clinisys PowerPath delivers a customized pathologist experience, including efficient workflows, data management, and integrated reporting, to ensure they have the right information at the right time to make treatment decisions.

Interoperability for better coordination of care

- Single sign-on via Microsoft Active Directory
- Support for foreign container IDs to eliminate re-labeling of materials
- Gyn Molecular instrument integration via Data Innovations® with automated sign-out
- Virtual fax support with Lane Data Solutions
- Delivery of document attachments to the EHR for a comprehensive view of diagnostic information
- Integrated reporting for combined AP and molecular resulting

Streamlined workflows and data management

- Role-based permissions for granular control of data access
- Comprehensive suite of standard management reports which can be customized and scheduled to auto-run
- Case Finder tool for robust ad hoc queries
- Enhanced support of PDF files in document management module

Quality and compliance

- Support for additional sexual orientation and gender identity fields
- Comprehensive quality control flagging and reporting
- Customizable and automated case correlation queues
- Support for College of American Pathology (CAP) electronic Cancer Checklists
- Cancer Registry interface for help with accreditation and regulatory reporting

Comprehensive Reporting with Clinisys VUE

Using Clinisys PowerPath and Clinisys VUE together streamlines the customizable worklists that allow for organization and management of cases based upon user preferences. Clinisys VUE also facilitates otherwise complex

integrations to deliver to deliver streamlined reports combining AP and ancillary molecular testing, such as cytogenetics, flow cytometry, and NGS.

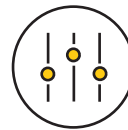

With flexible visualization and reporting, Clinisys VUE integrates multiple views of diagnostic information, helping pathologists efficiently and cohesively determine diagnoses.

Enhanced Sunquest PowerPath Functionality

Clinisys PowerPath includes Clinisys VUE, which further streamlines the diagnostic review process.

With fewer clicks and better access to key clinical data and sign-out tasks, Clinisys VUE improves decision-making, efficiency, and reporting in anatomic pathology labs.

Using both solutions together, anatomic pathologists can save 2-3 minutes per case.

Key Features

- Clinisys VUE
- Customized case worklist management
- Streamlined stain orders and custom stain panels
- Auto-text creation and management
- Enhanced synoptic reporting
- Integration of historical and concurrent results
- Cloud hosting by Clinisys option available
