

# Integrated analysis, reporting and workflow platform for pathologists

The Clinisys VUE solution advances comprehensive reporting and streamlines the diagnostic process for anatomic pathologists. Diagnosticians gain a single, holistic view of relevant patient data from multiple sources and can customize the layout to meet their workflow needs. It is included with either a Clinisys CoPathPlus™ or Clinisys PowerPath® upgrade.

## Enable comprehensive diagnoses

- Integrate data across concurrent/historical cases to allow for inclusion of prior patient data into current report
- View diagnostic data from anatomic pathology (AP), clinical, and molecular systems in one cohesive layout
- Review data, author diagnoses, and preview reports simultaneously via a unique widescreen or two-monitor mode

## Optimize pathologist capacity

- Manage patient priorities more efficiently with a worklist column chooser, filters, sorts, and saved lists
- Enable each user to organize information for the way they work, with customizable analysis layout
- Increase utilization of electronic ordering of additional tests and panels with a simple drag-and-drop experience and order confirmation

## Reduce turn-around time

- Streamline routine case activities such as editing, billing review, ICD coding, sign-out, and addendums
- Use comprehensive voice command and dictation integration to enable pathologists' existing shortcuts and workflows
- Quickly identify case and order status to accelerate completion of cases awaiting add-on tests

## Minimize opportunities for misdiagnosis

- See multi-disciplinary information from multiple systems in one application, linked by the same patient identifier
- Eliminate manual lookups and case data re-entry across systems
- Reduce the occurrence of case addendums for missed concurrent test results
- FHIR standards comprehensive data flow between disparate systems

---

# Integrated Pathology with Clinisys VUE

Through an innovative web-based user interface, Clinisys VUE presents relevant diagnostic information from multiple data sources to simplify data correlation, analysis, and interpretation. This innovative and elegant solution allows pathologists to create a comprehensive, integrated report for distribution to physicians and patient.

---

**With flexible visualization and reporting, Clinisys VUE integrates multiple views of diagnostic information, helping pathologists efficiently and cohesively determine diagnoses.**

 <p><b>Make it personal</b></p>	 <p><b>Minimize misdiagnosis</b></p>	 <p><b>Consolidate data</b></p>	 <p><b>Speed case turnaround</b></p>
--	---	---	---

---

## Integrated live reports

- Clearly and concisely integrate patient data from historical and concurrent cases into a master AP report
- Streamline synoptic report management and integrate data between reports with a simultaneous display of a text editor with quick text sync and live report preview
- Accelerate report creation by reducing dependency on word processing software

---

## Comprehensive patient view

- Aggregate multi-disciplinary diagnostic information from multiple sources, including Clinisys Laboratory,<sup>™</sup> Clinisys CoPathPlus,<sup>™</sup> and Clinisys PowerPath.<sup>®</sup>
- Link information from multiple systems for the same patient, avoiding manual look-ups across systems

---

## Dynamic diagnostician worklist

- Deliver a functional case list view supporting multiple saved worklists and digital pathology slide scanning status
- Allow for customizable filtering and sorting
